## Notice of Proposed Minor Source Program and Request for Comments

The Southern Ute Indian Tribe/State of Colorado Environmental Commission is seeking comments from interested persons on a proposed Minor Source Program, that is, an air pollution control program that will be applicable to sources of air pollution located within the exterior boundaries of the Southern Ute Indian Reservation that emit or have the potential to emit regulated air pollutants in amounts that are less than the major stationary source levels set by federal law and that are greater than the minor source thresholds set forth in the proposed program.

### I. Statement of time, place and nature of rule-making proceeding.

In addition to receiving written comments as provided below, the Environmental Commission will hold a public hearing at the Sky Ute Casino & Resort, John S. Williams and Vida Peabody Rooms, 14324 US Hwy 172 North, Ignacio, Colorado, on Wednesday, July 21, 2010, beginning at 4:00 p.m., to receive public comment on the proposed program.

### II. Legal authority under which the rule is proposed.

Legal authority is vested in the Southern Ute Indian Tribe/State of Colorado Environmental Commission by the Intergovernmental Agreement Between the Southern Ute Indian Tribe and the State of Colorado Concerning Air Quality Control on the Southern Ute Indian Reservation dated December 13, 1999 ("IGA"), tribal law (Resolution of the Council of the Southern Ute Indian Tribe # 00-09), State law (C.R.S. § 24-62-101), and federal law (Act of October 18, 2004, Pub. L. No. 108-336, 118 Stat.1354) to adopt rules and regulations for air quality programs applicable to all lands within the exterior boundaries of the Southern Ute Indian Reservation.

### III. Deadline for submission of written comments.

Please provide any comments on the proposed Minor Source

Program no later than Wednesday, July 28, 2010. Please submit your comments to Brenda Jarrell, Air Quality Program Manager for the Southern Ute Indian Tribe, by one of the following methods:

- E-mail: bjarrell@southern-ute.nsn.us
- Mail: Southern Ute Indian Tribe/State of Colorado Environmental Commission, c/o Brenda Jarrell, Air Quality Program Manager, Southern Ute Environmental Programs Division, P.O. Box 737 MS# 84, Ignacio, Colorado, 81137
- Fax: 970-563-0384
- Hand delivery: Air Quality Program, Environmental Programs Division, Southern Ute Indian Tribe, 116 Mouache Dr., Ignacio, Colorado, 81137

### IV. Summary description of proposed program.

The purpose of the Program is to establish a permitting and reporting program for existing minor sources and a preconstruction permitting and reporting program for new and modified minor sources located within the exterior boundaries of the Reservation. The program authorizes the imposition of emission limits and controls for those sources. The Program also provides a mechanism for an otherwise major stationary source to voluntarily accept restrictions on its potential to emit to become a synthetic minor source.

Minor source permits will include emission limitations, and monitoring, recordkeeping, reporting, and testing requirements to assure compliance with the emission limitations. Unless otherwise specified in the permit, compliance by existing sources must be achieved within three years from the date of permit issuance.

To determine the appropriate level of control and the corresponding emission limitations, the Tribe will require owners/operators to submit a best available control technology proposal for review by the Tribe on a case-by-case basis. In lieu of case-by-case control technology

review, the required level of control and corresponding emission limitations may, in the Tribe's discretion, be set forth in a general permit that may be established for various categories of similar sources with similar control technologies and capabilities. A draft General Permit to Construct/Operate Oil and Gas Minor Sources Located on the Southern Ute Indian Reservation is being proposed by the Southern Ute Indian Tribe for public review and comment concurrently with the Environmental Commission's proposal of the Minor Source Program.

Pursuant to the Program regulations, emission sources will be charged an application or registration fee as well as an annual emissions fee for releasing air pollutants into the Reservation air-shed. Fees will be used to fund administration of the Program and allow for the development of other necessary regulations.

The Tribe and the Environmental Commission will enforce civil compliance with the Program. Appealable administrative actions taken by the Tribe will be subject to review by the Commission in accordance with the administrative appeal procedures contained in the Commission's Procedural Rules.

### V. Where a complete copy of the proposed program can be obtained.

A copy of the proposed Minor Source Program is available upon request from the Tribe's Air Quality Program Manager who can be contacted by e-mail, mail, fax, or in person at the addresses noted above. The program also is available at the following website: www.southern-ute.nsn.us/suepd/links/commission\_related\_documents.html

## Public Notice/Request for Comments

PUBLIC NOTICE OF DRAFT GENERAL PERMIT TO  
CONSTRUCT/OPERATE OIL AND GAS MINOR SOURCES LOCATED ON THE  
SOUTHERN UTE INDIAN RESERVATION AND REQUEST FOR COMMENTS

**Summary:** The Southern Ute Indian Tribe - Environmental Programs Division is hereby giving notice of its proposed determination to issue, concurrently with the finalization of the Southern Ute Indian Tribe/State of Colorado Environmental Commission's Minor Source Program, a general permit to construct/operate oil and gas minor sources located on the Southern Ute Indian Reservation. It is estimated that there are over 900 minor sources of air pollution on the Reservation, the majority of which are internal combustion engines and associated equipment used for gas development. The Tribe wants to use a general permit instead of individual permits for permitting the air pollution emissions from those sources in order to reduce the Tribe's administrative burden of issuing separate individual permits. For regulated sources, the administrative burden of the application process is expected to be simpler for general permits than for individual permits and it will be much quicker to obtain permit coverage with the general permit than with individual permits. The emissions limitations and control technology requirements are expected to be about the same with an individual permit or under the general permit.

**Dates:** Public comments on this proposal must be received, in writing, on or before Wednesday, August 11, 2010. In addition to receiving written comments as provided below, the Tribe will hold a public hearing at Sky Ute Casino & Resort, Meeting Room C, 14324 US Hwy 172 North, Ignacio, Colorado on Wednesday, August 4, 2010, beginning at 3:00 p.m., to receive public comment on the proposed general permit.

**Addresses:** Public comments should be sent to Brenda Jarrell, Air Quality Program Manager for the Southern Ute Indian Tribe, by one of the following methods:

- E-mail: bjarrell@southern-ute.nsn.us
- Mail: Southern Ute Indian Tribe/State of Colorado Environmental Commission, c/o Brenda Jarrell, Air Quality Program Manager, Southern Ute Environmental Programs Division, P.O. Box 737 MS# 84, Ignacio, Colorado, 81137
- Fax: 970-563-0384
- Hand delivery: Air Quality Program, Environmental Programs Division, Southern Ute Indian Tribe, 116 Mouache Dr., Ignacio, Colorado, 81137

For Further Information Contact: The draft permit is available for download at: www.southern-ute.nsn.us/suepd/permitting/AirQualityPermitting.htm. Additional information may be obtained upon request by calling Brenda Jarrell at 970-563-4705 ext. 2246 or email bjarrell@southern-ute.nsn.us or by writing to the address listed above.

**Supplementary Information:** The general permit will be for the permitting of existing and new or modified minor sources that are comprised of any combination of the following regulated emission units and no others, that meet the requirements of the permit, and that have obtained coverage under the permit: natural gas fired reciprocating internal combustion engines; dehydrators; reboilers; heaters; and tanks.

Conditional approval for coverage for eligible sources may be obtained by submitting a complete application to the Tribe, by posting a prominent notice of the application for coverage under the general permit at the site of the proposed or existing source, and by confirming that the Tribe has received the application. The Tribe will be able to deny coverage under the general permit and require submittal of an application for an individual permit based on a 30-day review of the application for coverage and other information.

Final approval of coverage under the general permit is effective upon receipt of the written notice of coverage from the Tribe.

Existing sources must be in compliance with the terms and conditions of the general permit upon application for coverage unless the application for coverage is submitted within the first 18 months of the effective date of the Minor Source Program, in which case, the existing source must come into compliance within 18 months from the date coverage under the permit is obtained. New sources must commence construction within 18 months after the date coverage under the permit is obtained. Approval for coverage under the general permit will have no definite term. The term will be indefinite, lasting until coverage is terminated by the Tribe or the Tribe revises the permit.

Emission limitations are specified for natural gas fired reciprocating internal combustion engines that are part of a covered source and there are source-wide emissions limitations. The permit also includes monitoring, recordkeeping, and reporting requirements for each type of emission unit that may be part of a covered source. The permit includes compliance testing and reporting requirements as well as engine operation and maintenance requirements. Certain modifications, such as like-kind engine exchanges, will be allowed under alternative operating scenarios that are described in the general permit.

A permit application fee of \$300.00 will be required to obtain coverage under the general permit and an annual emissions fee of \$45.00 per ton + Consumer Price Index (CPI) of actual emissions must be paid for each fee pollutant, including fugitive emissions, to the extent they are quantifiable.
